TAKE ACTION

Children First Canada's *Raising Canada 2022* report highlights how the COVID-19 pandemic has amplified and accelerated **the top 10 threats to childhood** and disproportionately affected equity-deserving children and youth. This includes young people from racialized communities, First Nations, Métis and Inuit children, 2SLGBTQIA+ youth and young people with disabilities.

From coast to coast to coast, many children do not make it to their 18th birthday: The infant mortality rate in Canada is higher than in most wealthy countries, and suicide is a leading cause of death for youth. These devastating statistics are too alarming to be ignored.

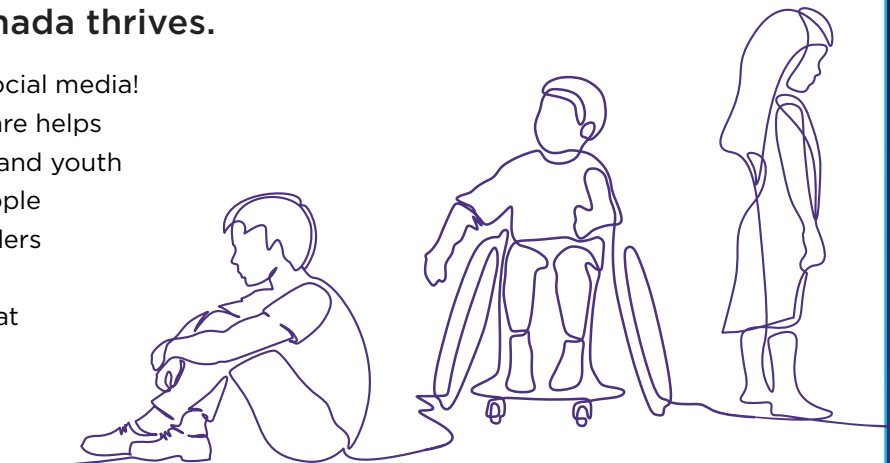

Every child deserves to survive and thrive.

Building a more prosperous and inclusive society will require the leadership of all Canadians – including parents and grandparents, leaders in the public and private sectors, civil society, as well as children and youth.

We are urging Canadians and the federal government to invest in the lives of all 8 million kids in Canada and address the inequities faced by young people today.

When kids thrive, Canada thrives.

Help us spread the word on social media!
Every tweet, post, like and share helps elevate the voices of children and youth across the country. Young people are leaders today and the leaders of tomorrow. They deserve to participate in the decisions that affect their lives.
